

white. 1654.

A new
ALMANACK

and Prognostication for
the Yeer of our Lord
God, 1654.

*Being the second after Bissextile or
Leap-yeere.*

Wherein is shewed the natural
inclination of the aire, and judge-
ment of the *Weather*, according
to the *Aspects* of the *Planets*,
and positions of the
Stars.

With other Rules, Tables, and
Directions, convenient in such
a work to be noted.

L O N D O N,

Printed by R. & W. Laybourn, for
the Company of Stationers.

**The beginning and ending of the Terms,
for this present yeare 1654.**

Return Dayes, or Dayes of Effoyn	Dayes of Exceptiō	Return Brevium	Dayes of Appearan
-------------------------------------	----------------------	-------------------	----------------------

*Hilary Term begins the 23. of January, ends the 13
of February, and hath four Returns.*

<i>Octab. Hil.</i>	Janua. 20	Janua. 21	Janua. 23	Janua. 24
<i>Quind. Hil.</i>	Janua. 28	Janua. 30	Janua. 30	Janua. 31
<i>Cras. Purif.</i>	Febru. 3	Febru. 4	Febru. 6	Febru. 6
<i>Octab. Pur.</i>	Febru. 9	Febru. 10	Febru. 11	Febru. 13

*Easter Term begins the 12. of Aprill, ends the 8 of
May, and hath five Returns.*

<i>Quind. Pas.</i>	Aprill 10	Aprill 10	Aprill 11	Aprill 12
<i>Tres Pasch.</i>	Aprill 17	Aprill 18	Aprill 19	Aprill 20
<i>Mens. Pasc.</i>	Aprill 24	Aprill 24	Aprill 25	Aprill 26
<i>Quinq. Pas.</i>	May 1	May 1	May 2	May 3
<i>Cras. Ascen.</i>	May 5	May 6	May 8	May 8

*Trinity Term begins the 26 of May, ends the 14 of
June, and hath four Returns.*

<i>Cras. Trinit.</i>	May 22	May 23	May 25	May 24
<i>Octab. Trin.</i>	May 29	May 29	May 30	May 31
<i>Quind. Trin</i>	June 5	June 5	June 6	June 7
<i>Tres Trinit.</i>	June 12	June 12	June 13	June 14

*Michaelmas Term begins the 23 of October, ends the
28 of November, and hath six Returns,*

<i>Tres Micha.</i>	Octo. 20	Octo. 21	Octo. 23	Octo. 23
<i>Mens. Mich.</i>	Octo. 27	Octo. 28	Octo. 30	Octo. 30
<i>Cras. Anim.</i>	Nove. 3	Nove. 4	Nove. 6	Nove. 6
<i>Cras. Mar.</i>	Nove. 13	Nove. 13	Nove. 14	Nove. 15
<i>Octab. Mar.</i>	Nove. 18	Nove. 20	Nove. 20	Nove. 21
<i>Quind. Ma.</i>	Nove. 25	Nove. 27	Nove. 27	Nove. 28

**Note this generally, that the first and last
dayes of each Term, are the first and last dayes
of Appearance.**

The Anatomy of man's body as the parts thereof
are governed by the Moon in the 12. Signes.

Physicall Elections

God to	{	Womē,	}	the moon or Signe in	{	♈
		Take Glisters,				♉
		Take Gargazilins,				♊
		Take Preparatibes,				♋
		Stop rhumes and fluxes,				♌
		Purge by sneeling.				♍

Fitt times for Bloud-letting.

The sanguine frō the new ☾ to the first quar.
The cholerick, from the first quarter to the full
The Slegmatick from the full to the last quar.
The melancholy, from last quarter to change.

Dangerous times for Bloud-letting.

In the heat of Sommer or cold of Winter, or
when the moon is in the Signe which governs
that part of the body you would let blood, also
within two dayes of the change or full moon

The common Notes and moveable Feasts

May 14		Advent Sunday	Decemb. 2
Decemb. 3			

A brief description of the particular things contained in this Almanack.

In the Almanack are 8 rows or columns in each month, the first is the number of dayes, the second the dayes of the week, in the third are the feſtiual dayes, and other both fixe and moveable, the beginning and ending of the Terms, with the change of the aire, the 4 is the age of the moon, the 5 is the motion of the moon (or the Signes, as we call it, through the Zodiack) the 6 is the new full and quarters of the Moon, the 7 and 8 is the time of high water at London-Bridge.

As for Example, the 18 of January being Wednesday, the Moon is 10 dayes old, & the Signe is in the Brms, and that day it is high water at London bridge at 11 o'clock at night.

The glorious Planet Venus hath bin our evening Star from the 27 of Iune the last year 1653, to the 16 of Aprill this present year 1654, and from thence to the 4 of February the next year 1655, she is our bright morning Star, ſhining very bright in the morning, before the riſing of the Sun.

January hath xxxj. dayes.

Warm meats, thick cloaths, this moneth are good,
No Phyfick, Bathes, or letting blood.

1 day Sun riseth at 8 and 3 min. Sets at 3 and 57 min.
15 day Sun riseth at 7 and 44 min. Sets at 4 and 16 min.

A Geographical epitome of the Map of England and Wales, wherein is shewed how each Shire is bounded and joyned to each other, and what Point of the Compass every County lyeth from the honorable City of London; (being lately published) The use of which, and the next Table, is explained, on the backside of the other Leaf. *M 23*

North

South

After the next leaf the whole compass, length, & breadth of England & Wales, with the great islands of these belong-
ing to the same, the length, & breadth of Ireland:
for Scotland, it is hard to be measured, the Alms being
long, but narrow, and scattered, being about 300. *An*

An Alphabetical Catalogue of all the Shires, Cities, Market Towns, Castles, Parishes, Rivers, and Parks. in everie particular Shire in England and Wales; with the distance of miles, and points of the compass from London.

The Explanation & Use of the former Map & Table

First for the Map: The figures in each Shire of the map, are to shew you the names of every County, & the Letters in the same are for uses, as I will shew hereunder.

You must understand that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, & the little black speck. or spot therein signifieth London. Now if you would readily find the name of any Shire therein, and how many miles the middle of the said County (in a straight line) is from London, & what point of the Compass it lyeth from the said City; resort then to the Table of Shires on the other side, and it will resolve you.

As for example, Berkshire it hath the figure of 1 in the map, & so it hath likewise in the Table; where is shewed that the middle or heart of that Shire is 40 miles from London in a straight line, & it lyeth full west from the City, and looking forward toward the right-hand, it sheweth it hath no City, 11 Market-Towns, 2 Castles, 140 Parishes, 3 Rivers, & 13 Parks. Again, Buckinghamshire hath the figure of 3 in the Map, & so it hath before it in the Table, the heart or middle of which Shire is from London 35 miles, & lyeth North west & by west from the said City, it hath no City, 11 Market-Towns, no Castle, 185 Parishes, 2 Rivers, and 15 Parks; and so of the rest.

The use of the Letters in the Map is this, S for Scotland, I for Ireland, F for France, M the Isle of Man, W the Isle of Wight, L the Lizard point, H Holy-head, the * the Irish Sea, B the British or English Sea, G the German Sea, B^a Barwick, D Dover, N Newcastle, C the points of Compass, S the Scale of Miles, by which you may measure the distance of any place, for every black degree is five miles, so is every white.

The 39 Shires from Berkshire to Yorkshire are the English Shires, & the other 13 from Anglesey, to Radnorshire are Welsh.

It may be something further in Miles to the middle of each Shire, by reason of the crookedness of the Highways, Hills, and vallies, but what is here set down is meant in a straight line from London, as is said. The

The Compasse, Length and Breadth of *England*, and the chiefe Ilands thereof.

England is in compasse ————— 1531. miles.
 The greatest length thereof Northwards and South-
 wards, from Barwick to the Lands end, is — 386. miles.
 The shortest length from Barwick to Calshot Castle in
 Hampshire, is ————— 186. miles.
 The broadest place from the Lands end to Sandwich,
 is ————— 279. miles.
 from S. Davids in the west in Pembroke-shire, through
 the midst of Worcester and Warwick-shire Eastward to
 Yarmouth in Norfolk, is ————— 240. miles.

The Ile of M A N.

The Ile of Man is in compasse ————— 91. miles.
 The length is ————— 28. miles.
 The breadth is ————— 18. miles.

The Ile of A N G L E S E A.

The Ile of Anglesea is in compasse ————— 85. miles.
 The length is ————— 21. miles.
 The breadth is ————— 18. miles.

The Ile of W I G H T.

The Ile of Wight is in compasse ————— 57. miles.
 The length is ————— 22. miles.
 The breadth is ————— 11. miles.

The Compasse, Length, and Breadth of I R E L A N D.

Ireland, reteating the adjacent Ilands, and some Undrains,
 is in compasse ————— 948. miles.
 The length North and South, is ————— 303. miles.
 The breadth East and West, is ————— 117. miles.

Since the States Government, 4. years, Ianua. 30.

A Prognostication;

The explanation of the former Table.

NOte that every King began his reign, the same time that the next precedent King ended his.

If you desire to know how long it is since the beginning of the reign of any King, look how long it is since the ending of the precedent King, and there you shall find your request.

As for example: if you would know when King Henry the 8 began his reign, how long he reigned, & also how long it is since his reign: find out first his name amongst the names of the Kings, & searching the row towards the right hand, you shall find he began his reign in the year 1509. the 22 of April, and under the title of the time that he reigned, is 37 yeares, 10 moneths, & 2 dayes: And looking forward in the same row, where is 144 yeares, April 22 under the title of since his reign began.

How to judg what Weather will follow, by the rising and setting of the Sunne.

The Sun rising bright & clear, signifieth a pleasant day: If he rise fiery red, it promisseth rain: if in his rising he be thinly overcast with a cloud, it be tokeneth foul weather: if the sun & the clouds be fore him into the West, it signifieth fair weather. If at his rising there appear a circle about him, & banisheth away equally, it be tokeneth fair weather. Also if he setteth red, it signifieth fair weather: If at his setting he be of diverse colours, or clouds like water, it threatneth rain. If at the rising of the Sun, his beams seem red, or long, or encompassed with red clouds it signifieth great winds: if at his rising there appear a thick mist, or if it raineth in the evening, it threatneth very foul weather to follow. Also if the Sun beams be spotted either green, pale, or black, or as he were in a cloud it signifieth rain. The Sun setting clear without any cloud, signifieth a fair night to ensue. If the

circle, or circles about the Sun be clear, & of no continuance, look for fair weather: If there be many circles, it signifieth winds: the redder they are, the more vehement winds. If the circles are here & there broken, & are thick & black, look for cold wind or snow: or if he settle behind a great black cloud, rainfolowes.

How Weather is foreknown by the Moon.

If the Moon in the third day of her change, or three dayes before her full, or in the midst of the quarter, be found of pure light, nothing compassing her, the ends direct up, she promisseth faire weather: but bent to red colour, prebokeneth winds. The Moon pale, or somewhat black or thick, threatneth rain. When the Moon is five dayes old, mark the typps of her horns, if they be blunt, it signifieth rain: if sharp pointed & pricking upwards, great winds. If in the fourth day after her change, she have a red circle about her, it signifieth winds and rain.

Of the judgment of Weather by the Stars.

If the Stars appear of much light, and seem to be of more bignesse and blazing then ordinary, it beokeneth great windes and moysture in that part where they seem so; and in Winter, great frosts. When dim Stars appear with long fiery rayes, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also when Starres seem to shoot or fall, it signifieth great winds in that place: If they seem to shoot in diuers places, it signifieth diuers windes: If in all places, windes, thunder, lightning, and most tempestuous weather:

How to judge of the weather by the Clouds.

Black clouds flying from the east, signifieth rain at night, if from the west, rain the next day; if they flye low, and appeare to settle upon the tops of hills, it is a signe of cold weather, if they

White, 1654.

be full charged, and appear white like to snow, hail is at hand: if white clouds appear in winter, two or three days together at sun rising, it is a signe of cold and snow, but black clouds signifie rain. A red sky in the evening, and a gray morning is a sign of a fair day. Mist falling in the morning, in spring or harvest, also mists over ponds or waters in the morning shew rain. If the clouds fly swiftly in the ayre, it signifies rain from that part of the heavens, especially from the north or south. If thick white clouds gathered together in many places like flocks or heaps of wool appear in many places, it is a sign of rain: but if thick dark clouds towards the north or west near the earth, presently rain, and if like hills a little above the earth, foul weather is over. If mists descend from the hills, and settle in the valleys, it is a sign of fair hot weather next day: or if white mists arise from the waters in the evening.

How to judge of the weather by the Rain-bow.

The natural signification of the Rain-bow, is to shew rain either past or to come. The Rain-bow appearing when it is fair, is a signe of foul weather: when it is foul if it appear, it is a sign of fair weather, the greener it appears the more rain, the redder the more wind; if before noon then the rain is spent; if the rain-bow appear about one or two in the afternoon, then rain is near. A rainbow in the morning is a sign of wet (unless there be brought in the air) if it appear in the evening it is a sign of fair weather (unless the air abound with moisture.) A rain-bow at night opposite to the moon, is a sign of much small rain and wind to follow. A rain-bow after long rain is a sign of fair weather presently; if two rainbows appear together, it is a sign of rain within one or two days after.

White 1634.

*Certaine and short Rules, for the comforting
of the chiefe. official Members of the
Body of Man.*

Things which are good to comfort the Head.

Lignum-Aloes, Marjoram, Salingale, Muske,
Rosemary, Roses, Camomell, Rue, Frankin-
sence, Nutmegs, Hyssop, Balme, Mints, Spike, and
Clayden.

Things good for the Eyes.

Fennell, Herben, Cloves, Cold-water, Celendine,
Cybright, Roses, and Agrimony.

Things good for the Stomack.

Nutmegs, Cloves, Dillanum, Corall, Saffron,
Quinces, Wormwood, Olibanum, Agrimony, Fuma-
tory, Wallack, Lignum-Aloes, Spodium, and Corian-
der prepared.

This good for the Heart.

den-hair, Ellicampane, Distaces, and Benedes.

Things hurtfull for the Body.

Meates hurtfull to the Teeth.

Nattes, Meats very hot, Warmed drink, Sweet
meats and drinks, Radish Rootes, Hard meates,
Bitter meates, Milk, much Vomiting, Leeks, Far of
Fish, Colworts, and Lemmons.

Things hurtfull to the Eyes.

Garlick, Onions, Radish, Drunkenness, Letchery,
Sweet & thick wines, salt meates, Colworts, all Pulle,
Must, wine, Dust, Smoke, Fire, and reading yelow
water. Supper.

White. 1654.

Of the Eclipses this year 1654

There will appeare four Eclipses this present year, two of the Sun and as many of the Moon; three of which will be visible in our British Hemisphere.

The first to us is a nonvisible solar eclipse, upon the 7 Feb. near our 6 a clock in the morning, and though it is not visible to us, yet it will be conspicuous to such as sail in the South Indian Sea, and to them that inhabit the Lucach, Beach, and Maler Kingdoms, the Islands Des Romeros, and the Provinces of India, &c.

The second is of the moon, on Tuesday Feb. 21. at 6 a clock and 14 min in the morn. at which instant the moon will be darkened by the earths shadow, 4 dig. 1 min. as the type demonstrateth.

North

ho. m. sec.

Beginning at	5 5 50	} in the moor- ning.
Middle at	6 14 18	
End at	7 22 46	

This Eclipse will be observed at Toddington but in part, for before the end thereof the moon sets in the west, but it will appeare in their meridian who are under the longitude 287. deg. 25 in namely to the inhabitants of Florida, Parvana, in America &c. so on the contrary those people shall see her rise eclipsed in new Guinea, the Islands of De la Drones, and in the Kingdom of Quivira, but in England, Scotland, France, Spain, and such places as lie under and near the same parallel with us, it will appear in her going down.

The third is a great eclipse of the sun, Wednesday Aug.

2. in the forenoon, & will be very conspicuous at Toddington (if the aire be clear) the sun darkned by the body of the moon 10 digits, as by the type

Beginning at	7 44 47	} in the moor- ning.
Middle at	8 56 24	
End at	10 14 37	

White 1654.

The fourth eclipse is of the moon, on Wednesday the 17 of August in the evening, which will likewise be seen at Todington (if the clouds hinder not) as this type demonstrateth.

Beginning at	}	9	43	26
Middle at		10	37	22
End at		11	32	21

The digits eclipsed are 2. 36 min.

The Explanation of a new and easie K A L E N D A R here following, for this present Yeare, 1654.

NOte that every Month containeth three Rows of Columns (the Figures for the number of daies excepted) The first Columne toward the left hand containeth the Week Dayes and Sunday Letter; the second the Signe wherein the Moon is every day. And the third the Changes & Quarters of the Moon. Note that the being thus O figured, doth signify the New Moon; & placed this way is the first Quarter: this the Full Moon: and again this the last Quarter. Note also that the Figures over the head of the Moones doe signify the howes of her Change, Full, or Quarters, and the Letters above or beneath, the time after noon, or after midnight, N standing After noone till Midnighe, and M for after Midnighe till Noone.

As for example, against the 8 Day of January, being Sunday I doe find the Moon (or Signe) in Ψ . Capricorn, or the knees, and is thus O charactered, which is the change or new Moon, at 4. in the afternoon. Again, on March 15. being Wednesday I doe find the Moon in Γ . Cancer, or the breast, and is thus I charactered, which is the first Quarter at 10. in the fore noon; and so of the rest.

Note, also, that at the head of every month is placed the rising and setting of the Sun for the midst of every month: As for example, for the midst of January, the \odot Sun riseth at 7. of the clock and 44 minutes; and setteth at 4, and 16 minutes, &c.

It also containeth (on the back side of the Leaf) for every month the Feastes both Moveable and Fixt, with the beginning and ending of every Terme: As Twelf day is on the 6. of January, Easter day is on the 26. of March, Whitsunday is on the 14. of May. Terme begins on the 12. of April, and endeth on the 3. of May, &c.

brjete and easie Almanack for this Yeare
1654. which being cut out, is necessary to be
 placed into any *Book of Accompts, Table-book,*
 or other, conteyning the whole Kalender, in
 a short method; By *William White.*
